

BONDS and EURO UPDATE Yields to continue lower DEPSITE quarter end confirmation.

I might be tempting fate by sending this update before Mr Draghi has finished BUT the markets are SHAPING up for continued lower YIELDS and EURO!

Chart 3 DOES HISTORY REPEAT ITSELF.

European bonds have been all failing 50 day moving averages.

****LIQUIDITY : NOT TO BE OVERLOOKED****

Liquidity certainly does now seem to be an issue as Italy remains void of any decent cash flow and the futures ranges are extensive on light volume.

I don't normally venture outside the technical space BUT to me a major concern is LIQUIDITY and lack of it, certainly if another Italian situation arises. Most orders now are generated or routed via a system, markets are made-quoted by a system. None of these have been really tested in a 2007 type situation, DESPITE many RSI's predicating a REPEAT. Last week proved liquidity in Italy to be appalling due to circuit breakers and management reluctant to quote on MTS-Tradeweb.

IT can be argued, "there is still futures" BUT some contracts are NOW made up of 75-90% ALGOS, this is not a good statistic, especially when they were ABSENT post the big USD SWISS move. Also margin increases are possible. This lends itself toward MORE OPTION plays, achieving longevity on IDEAS and not get stopped on an illiquid blow out.

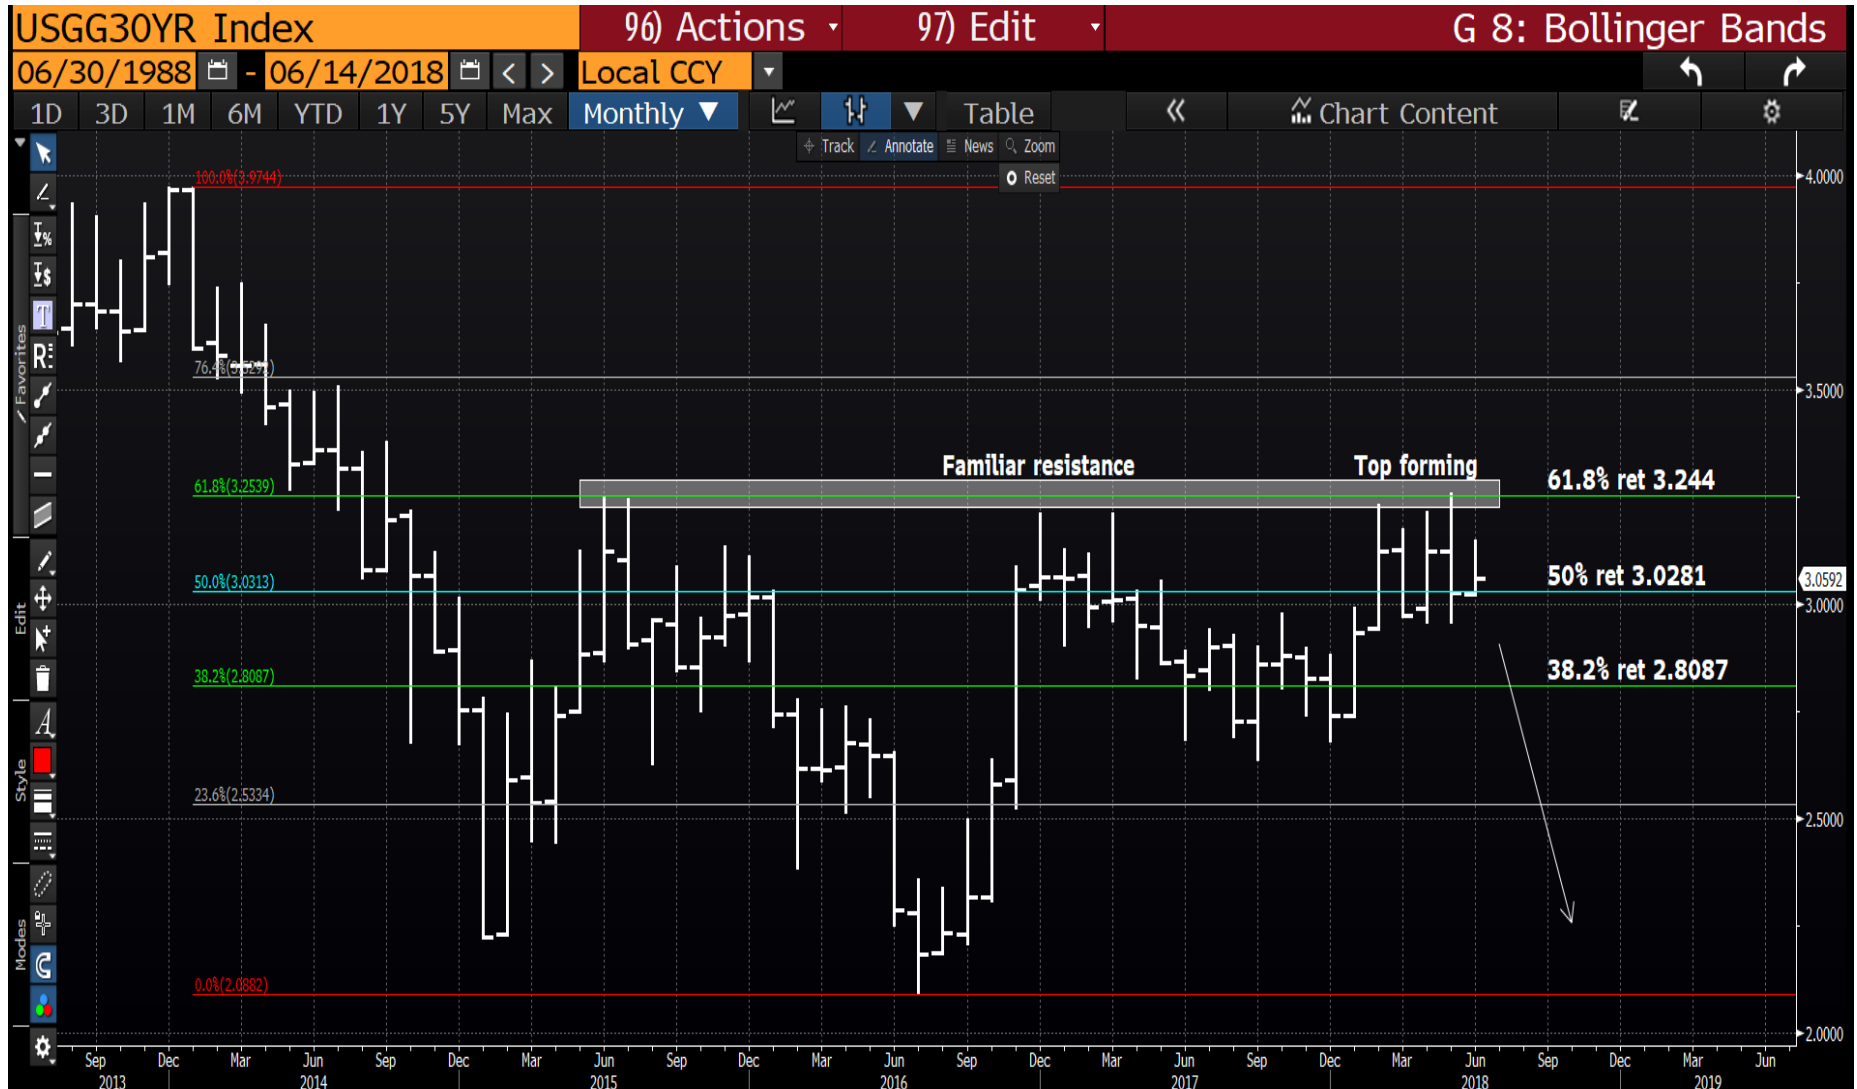

US 30yr yield quarterly : This quarters upside pierce is gaining more prominence and thereby endorsing lower yields.

US 30yr yield quarterly : Does history repeat itself? ON ALL previous occasions yields have dropped and especially when we have DOUBLE UPSIDE PIERCES, as NOW!

US 30yr yield monthly : We have stalled against the 61.8% ret 3.244 and hopefully can sustain a HOLD sub the 50 % ret 3.0281 into quarter end.

14/06/2018

US 10yr yield quarterly : The RSI dating back to 1984 is not going to go away, thus the BIAS still remains for lower yields. We are teasing a VERY reliable 50 period moving average 2.9088. Ideally we achieve a lower yield close at the end of the quarter.

14/06/2018

US 10yr monthly : Another top potentially in and sub the 76.4% ret 2.6425 will confirm. The RSI remains highest since 2000.

US 5yr quarterly : Despite the latest yield rally the RSI is as HIGH as 1982!

This long-term chart is backed up by the monthly therefore it's a MAJOR disparity, thus could form a long-term peak.

14/06/2018

US 5yr monthly : A MAJOR statement as we are now back in the LONGTERM trend channel (2.7687), the RSI has A LOT of unwind potential. Key break would be SUB the moving average 2.5051.

14/06/2018

US 5yr monthly : This is a MAJOR long-term channel, we have failed here before. Once back in the channel and we will witness a SIGNIFICANT yield DROP.

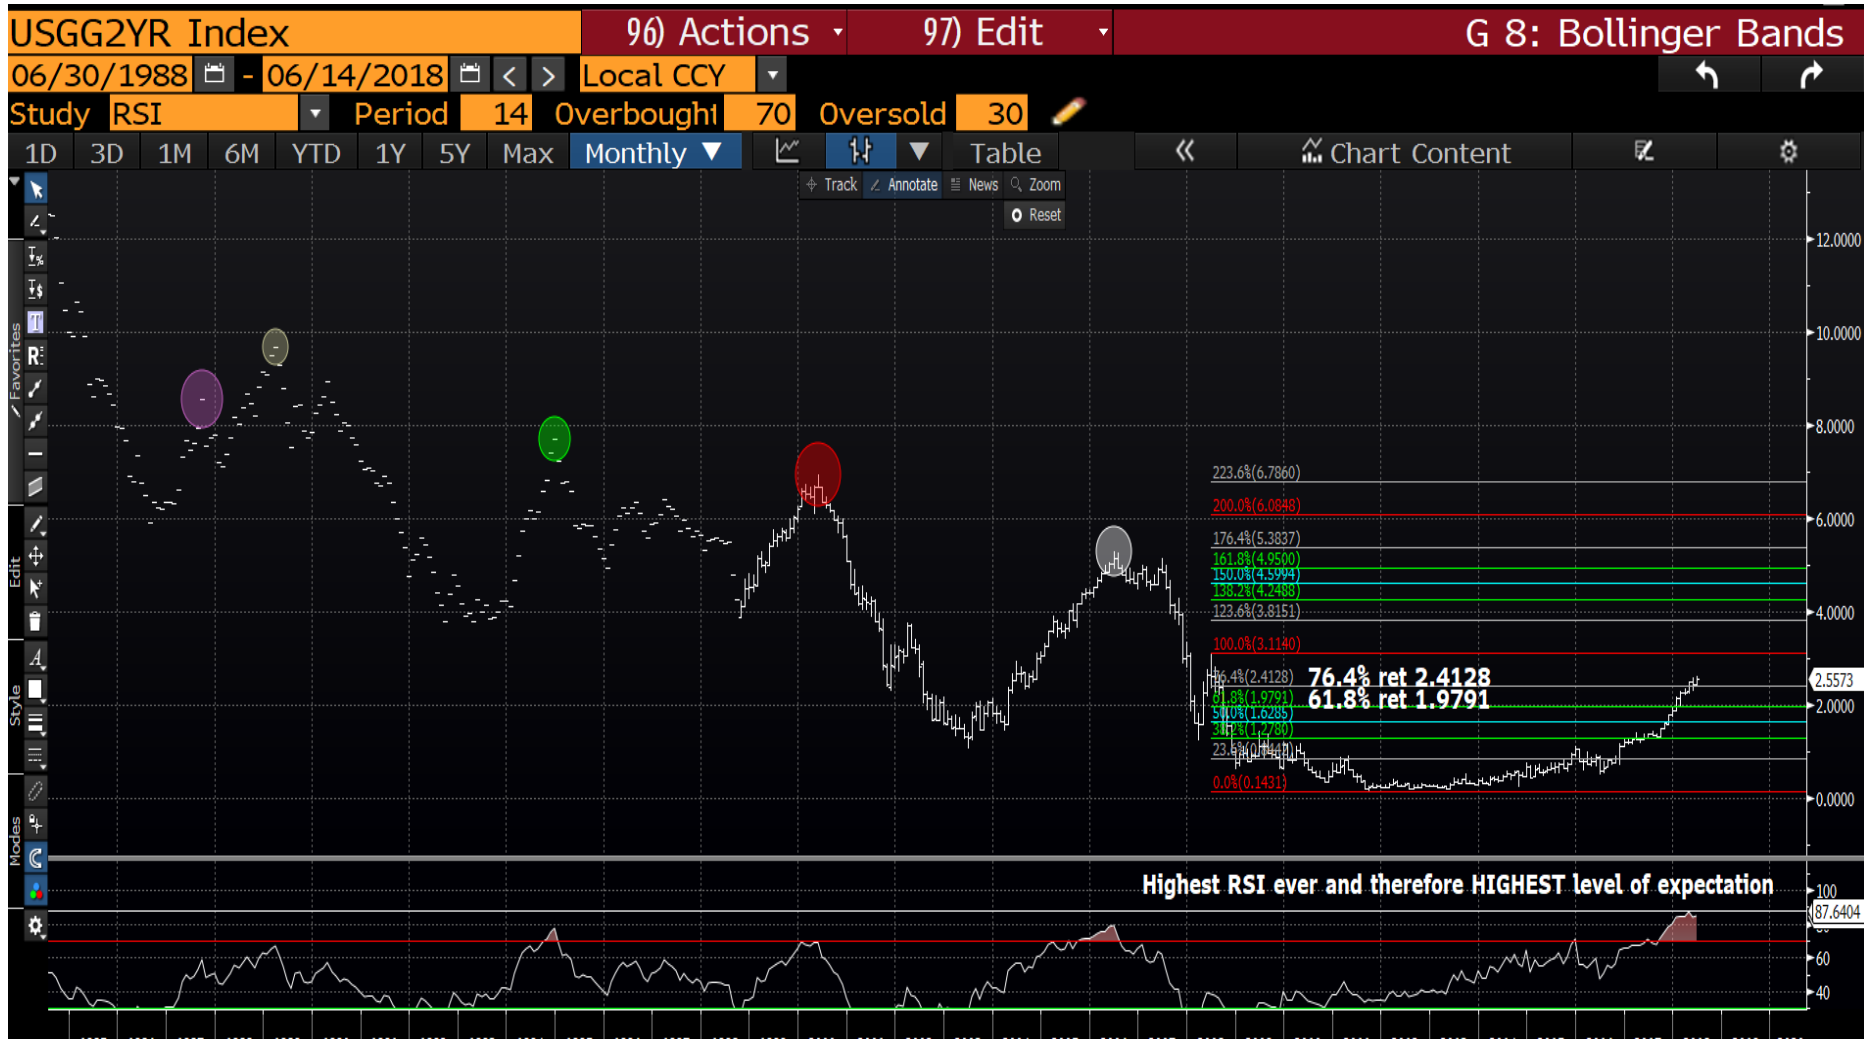

US 5yr weekly : We have failed the 50% ret 2.8846, targeting the 38.2% ret 2.330. The RSI at 1984 levels!

14/06/2018

US 2yr monthly : I would not normally chart something this short BUT it does go some way to explaining how HIGH expectation is!? A close sub the 76.4% ret 2.4128 will be a MASSIVE step for lower yields.

Generic German 10yr quarterly : We have 2 major upside pierces and are back inside the channel 0.466. Hopefully we can grind lower into month end.

14/06/2018

Generic German yield daily : We have failed the 50 day moving average 0.514 and a close sub the 38.2% ret 0.421 will be bearish for yields.

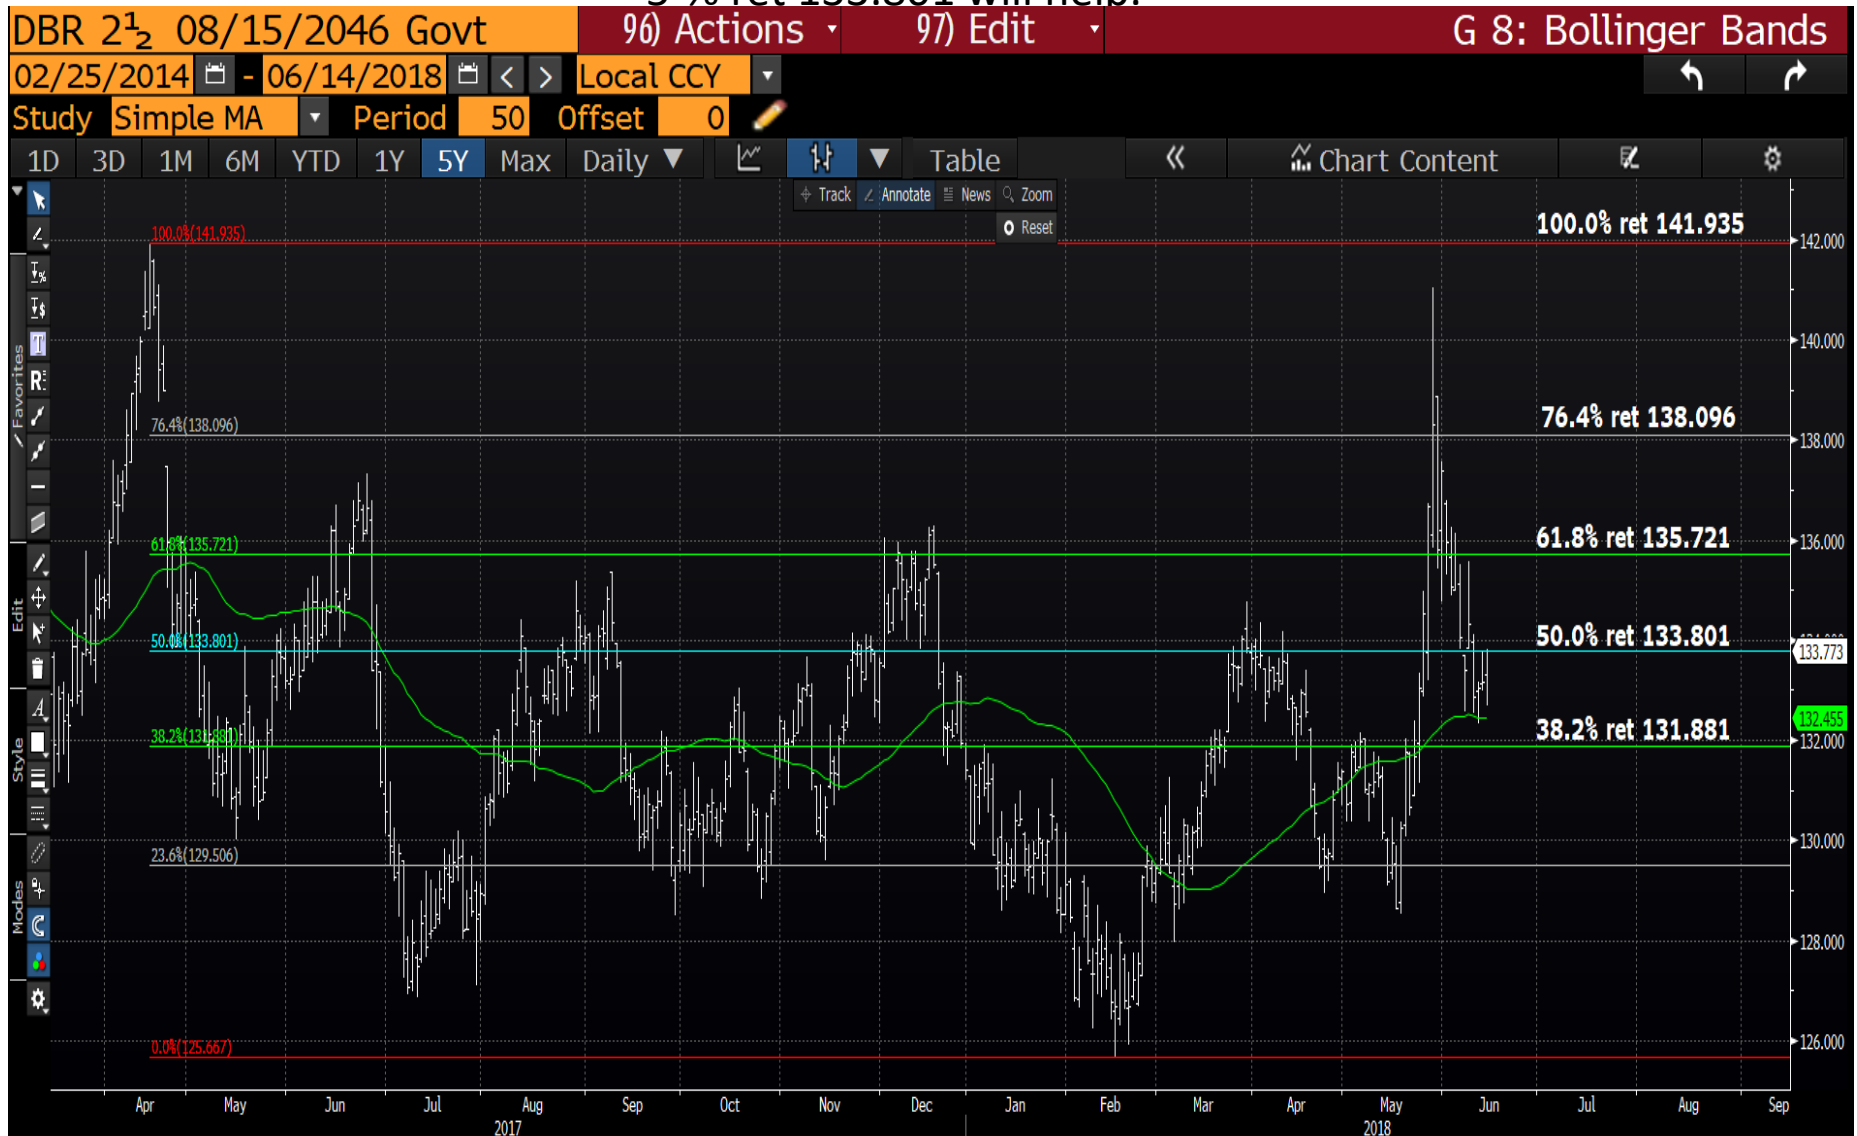

UK 10yr monthly : Hopefully we can dip back below the 2008 trendline 1.349 given the 50 period MOVING AVERAGE resistance 1.549 is looming.

UK 10yr yield daily : We have failed the 50 day MOVING AVERAGE and a close sub the 50% ret 1.307 will help a lot.

DBR 46 daily : This time we have HELD the 50 day moving average and a close above the 5-% ret 133.801 will help.

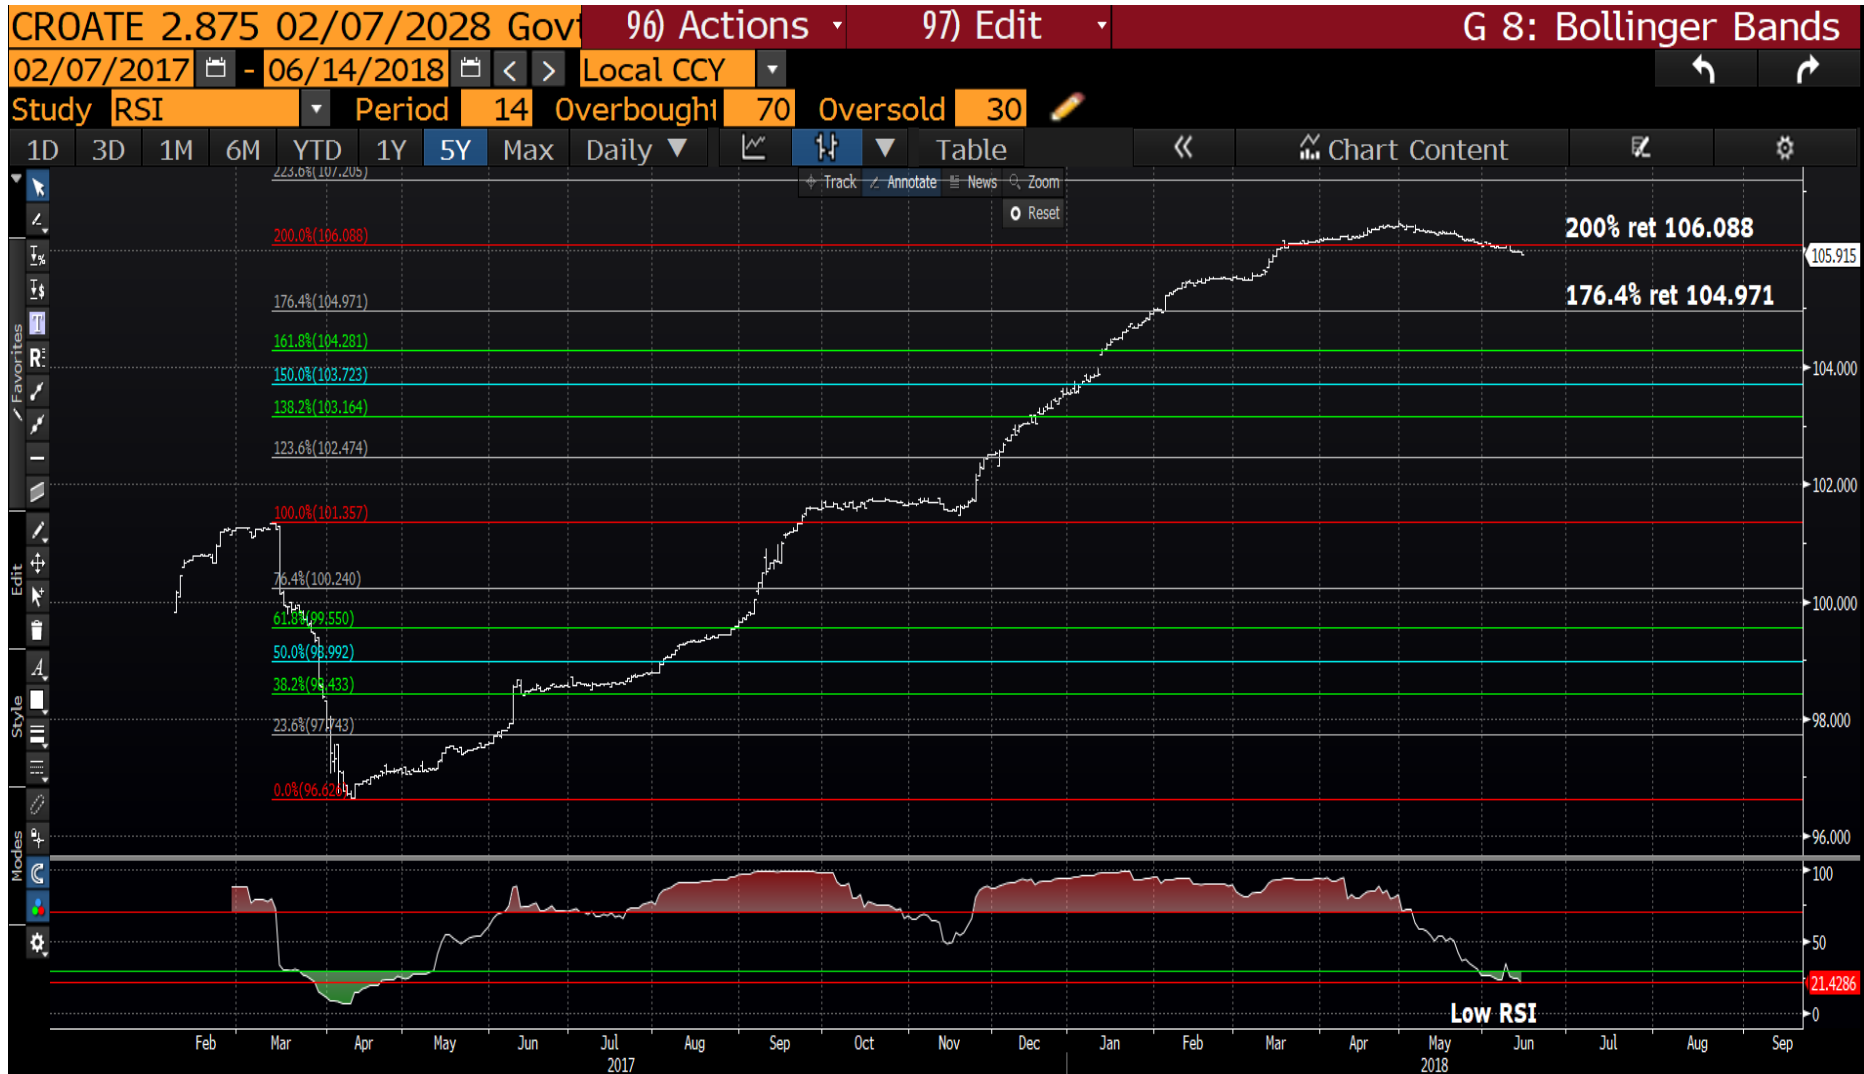

Italian generic 10yr daily : The recent volatility has CHOPPED UP the RSI making it redundant. Tough to call here and probably MORE fundamental and liquidity driven.

Portugal 27's : For the first time in a long while PGB is a worry but the RSI is neutral.

**Croatia 28' daily : The RSI is now VERY low but we have dipped below the 200% ret 106.088. We are also SUB the 50 day moving average 106.243 for the first time in many years.

EUR USD quarterly : We continue to remain negative given we are sub the 38.2% ret 1.2372 and RSI remains at 2014 levels.

EUR USD monthly : We are currently struggling to breach the moving average 1.1552 but sub that will continue the longer-term trend. Any new low this month will be a disaster for the EURO longterm.

EUR USD daily : A near perfect and abysmal FAILURE at the 38.2% ret 1.1855. The OLD LOWS look a decent draw!
