

# EQUITIES

**EQUITIES SPECIAL : “LETS GET READY TO RUMBLE”.** The latest bounce is starting to **WANE** and this could **SNOWBALL** into the next bigger capitulation. We are failing **MANY** daily 50 day moving averages and Europe will lead the way.

Trade ideas running and **STILL** time.

Buy Dax FEB 10400-10300 put spread @ 21.1 **Now 19.2**

Buy E Stox FEB 2900-2800 put spread @ 12.7 **Now 10.2**

Although no **NEW** monthly lows we haven't rallied **MUCH**. It's a matter of **TIME** before stocks head lower **AGAIN!**

Equities **REMAIN** very damaged goods! Europe is in a terminally bad way whilst the **US** is close to confirming the 10 year **“RALLY”** is over.

**DAX** page 2 remains **OUTSIDE** a significant and **LONG STANDING** channel.

Overall I still favour a **MAJOR DROP** and this weeks close is **KEY**.

# DAX monthly : \*\*\*THE PERFECT TOP IS FORMED\*\*\*

There is little positive about this chart. We are sub the longstanding moving average, and channel with minimal chance of breaching either. This is a TERMINAL chart.

Dax daily : This weeks bounce has been minimal, already we are showing signs of fatigue.  
We have breached the 23.6% ret 10969.53, its FREE FALL TIME.

14/01/2019

Eurostox monthly : We are teasing the multi year 50% ret 3069.16 but this is not the most dynamic nor coiled market.

Eurostoxx daily : The moving average has been solid resistance ALL THE WAY and failure to breach it is historically represented. We are now sub the 61.8% ret 3071.92 this is VERY bearish.

FTSE monthly : Another market at a critical decision point. We are teasing the 6950.90 moving average, next step is a RE-BREACH of the 100% ret 6751.30. If the retracement is breached then its FREE FALL time.

14/01/2019

FTSE daily : Friday formed a NASTY top and we are now sub two major levels i.e the 38.2% ret 6988.78 and 6910.20 moving average. This does not bode well.

S&P (future) daily : We have a decent headwind given the 50% ret 2636.13-moving average. A close sub the 38.2% ret 2560.75 will be very beneficial.

14/01/2019

DOW quarterly : We have a “TOP” but need to capitalise on that with a move SUB the 23344.52 previous low.

DOW daily : We have a healthy bounce but resistance looms via the 76.4% ret 24195.84 and 24436.73 moving average. This should be a healthy bounce to fade.

E Mini weekly : A very tough chart given it BULLISH theme derived by the downside pierce, low RSI and 2354.41 moving average HOLD.

E Mini daily : Another daily chart running into a resistance headwind, we just need to breach the 38.2% ret 2560.75.

Russell monthly : We have had a sizeable bounce but looks doubtful it will repair the terminal damage.

RTY daily : We are about to kiss the 1455.570 moving average-38.2% ret 1438.198, failure here will be a KEY statement.

CCMP monthly : Another bounce but it needs to recover further or ELSE.

CCMP daily : Another PERFECT failure opportunity given the reliable nature of the 50 day moving average 7013.204. Stall here and we head back through the recent lows.

This remains a troubled sector.

Hang Seng monthly : This has been the ONE survivor SO FAR, we have religiously held the 25217.56 moving average but am sure it will follow other markets lower. A breach of the moving average will open the flood gates.

Nikkei monthly : The 50% ret 20489.16 is looming and any breach will confirm overall failure.
