

CORE BOND YIELDS : WE CONTINUE TO HEAD LOWER AND CLOSE TO BREACHING RECENT YIELD LOWS. Despite the lack of equity activity bond yields continue to head lower, aided by numerous 1982-1984 dislocated RSI's. A key week for yields to **FALL FURTHER.**

The long-term quarterly-monthly charts continue to forecast **MUCH** lower yields and the daily's are merely dictating that **PACE.**

On paper the quarterly and monthly charts are obvious, its **MUCH** lower yields. We are failing **MANY RARE 50 and 100** period moving averages aided by RSI dislocations that date back to 1980's. The formations are staggering given the previous upsets in and around 2000 - 2007.

It seems from a chart perspective everyone is convinced rates are going **MUCH HIGHER** based on the **HISTORICAL RSI** dislocations. Expectation and positioning is way too optimistic.

The weekly charts are more optimistic for a **HOLD** but daily negate that almost instantly.

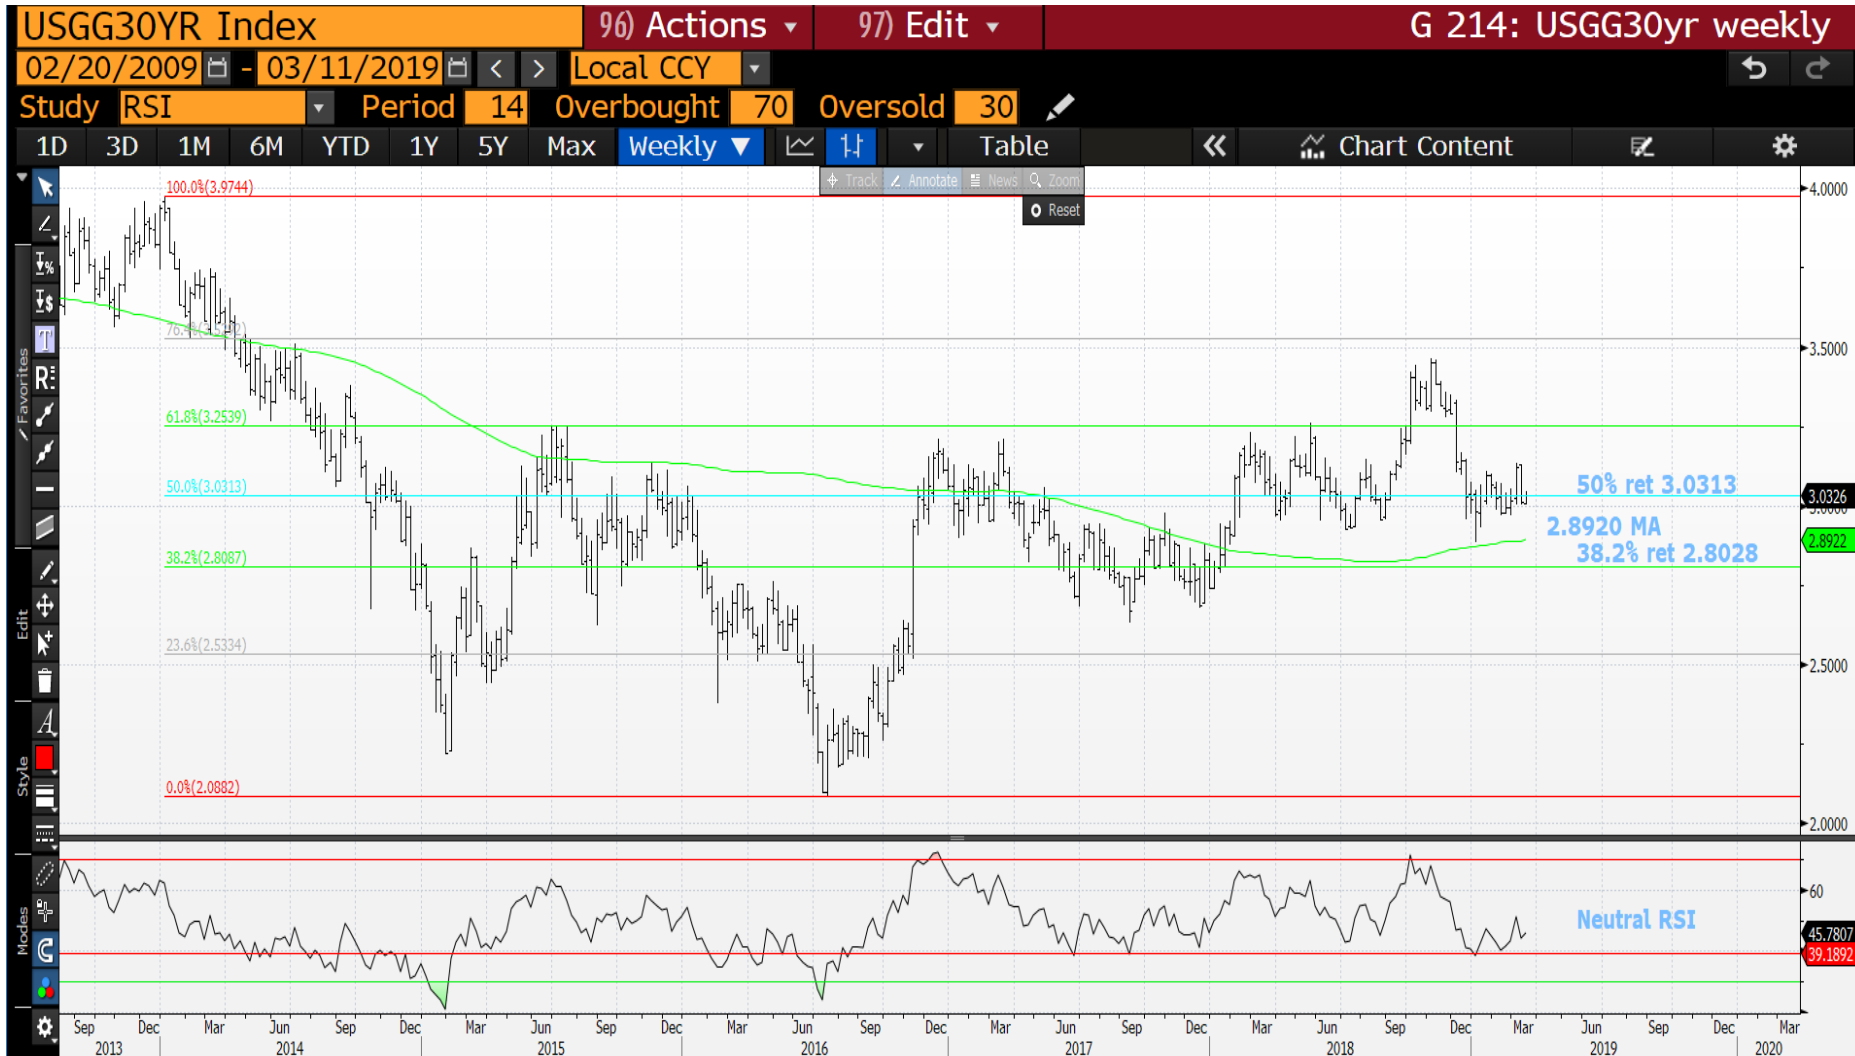

Daily charts have persisted in remaining sub numerous 200 day moving averages, so ideally its all a matter of time.

Germany and UK also point to lower yields, whilst Italy is holding a previous low.

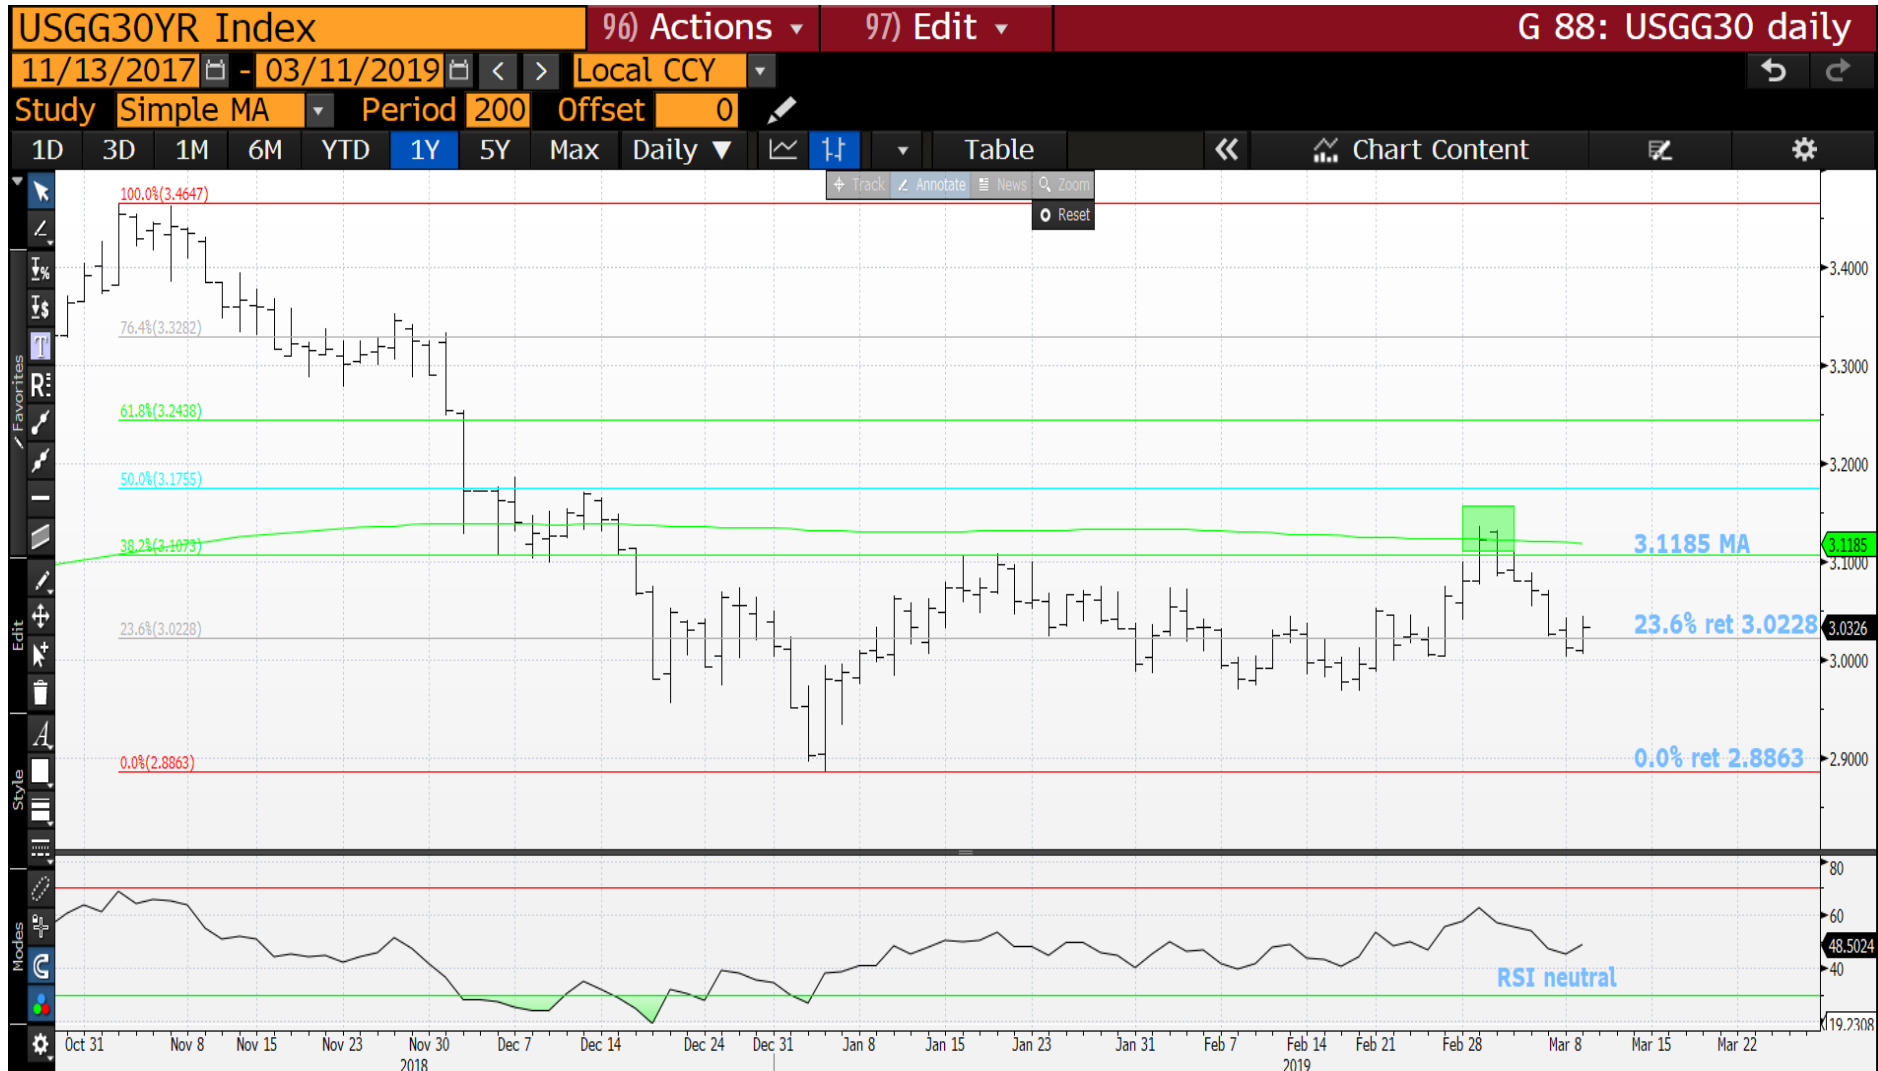

USGG30yr monthly : The 100 period moving average 3.1422 works well to highlight the previous HISTORICAL failures. It does imply we see yields head lower providing we remain below the moving average.

USGG30yr weekly : This is where the CONFLICT is, we are holding above the 200 period moving average 2.8920. Ideally we close sub the 38.2% ret 2.8028 this week, to then compliment the monthly and quarterly view.

USGG30yr daily : The daily is marginally more encouraging despite the neutral RSI, we are holding sub the 3.1185 200 day moving average and close to breaching the 23.6% ret 3.0228.

US 10yr yield quarterly : Another superb extreme example, few times ever have we kissed this 50 period moving average (Currently 2.7823). The RSI is also of note given it is the HIGHEST (level of expectation) since 1984!! If history repeats itself we have a long way to go.

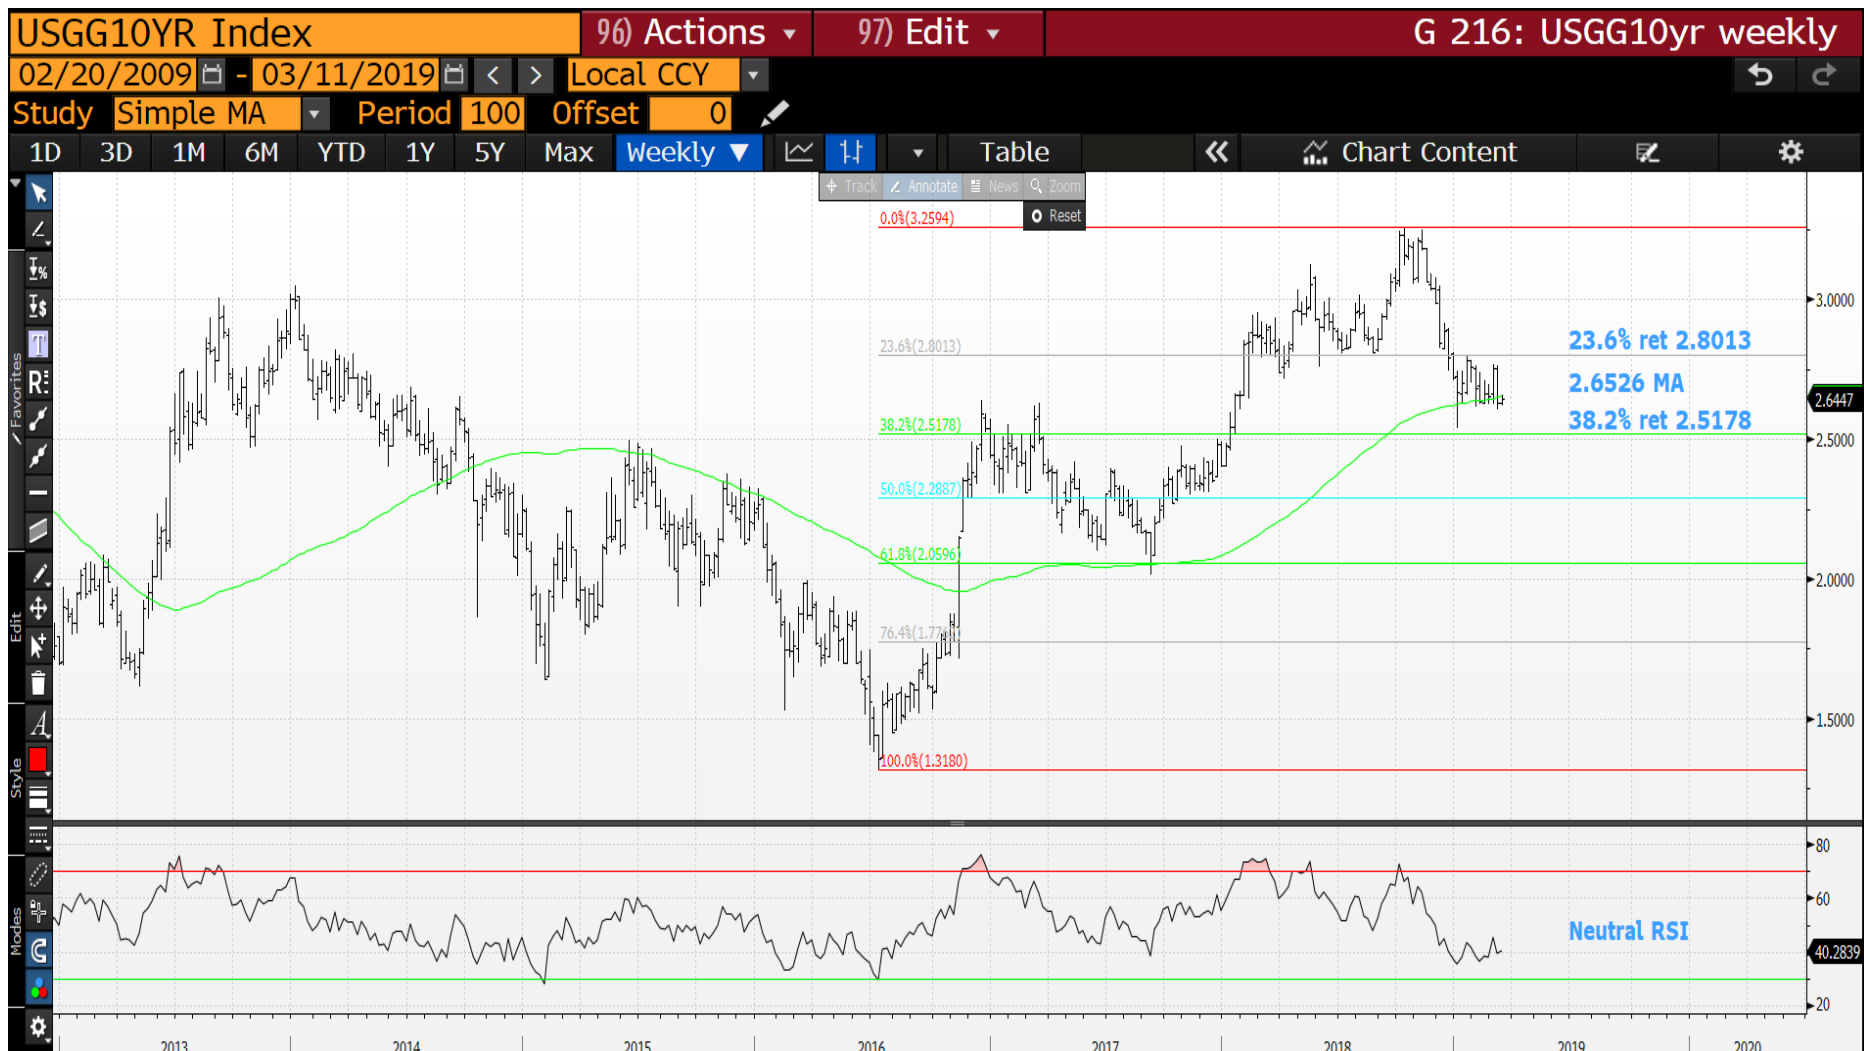

11/03/2019

US 10yr yield monthly : A PERFECT hit on this 200 period monthly moving average 3.1526, talk about RARE! The HIT was a nice rejection thus need to capitalise in this. Historically yields can go a lot lower.

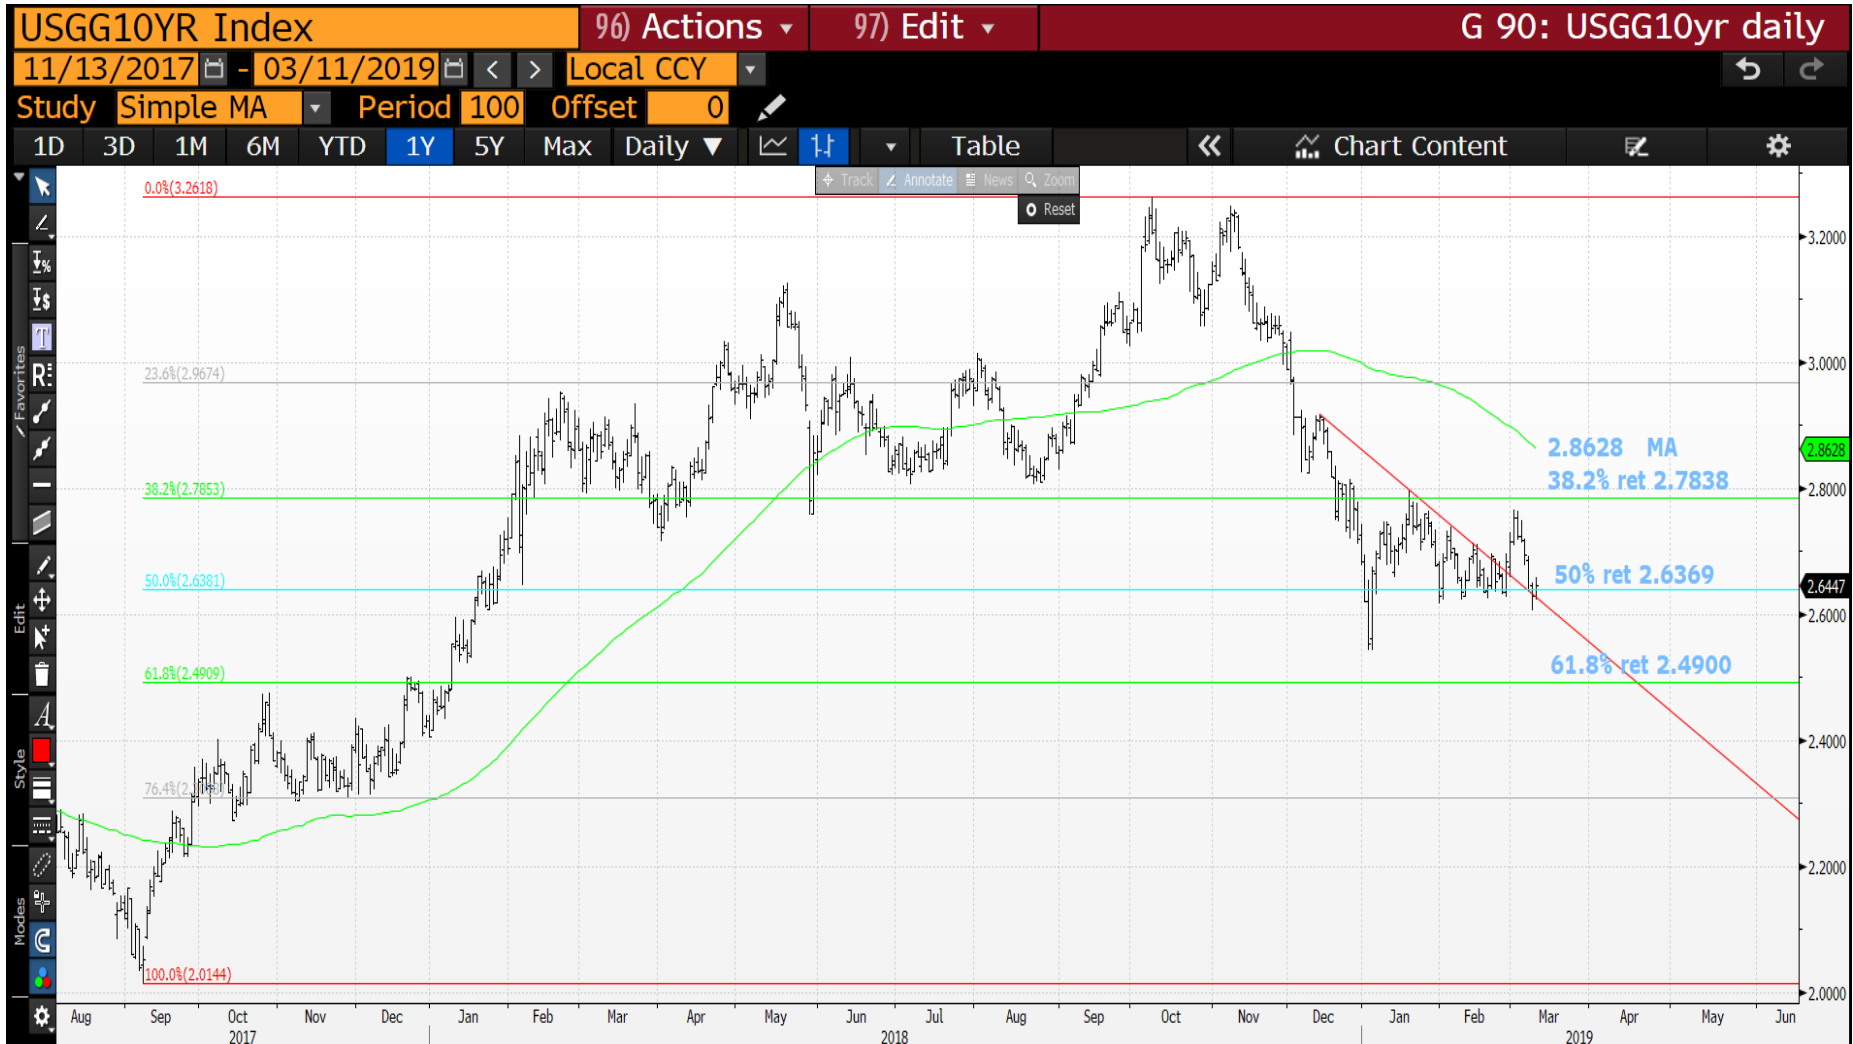

11/03/2019

USGG10yr weekly : Again we are in a scenario where the weekly NEEDS to break lower. Currently we are holding the 2.6526 100 period moving average and above the 38.2% ret 2.5178. We need to make a decision and BREAK lower soon.

11/03/2019

USGG10yr daily : Again the daily helps endorse the argument for lower yields given we are teasing the 50% ret 2.6369. Ideally a breach of the 61.8% ret 2.4900 and there is no argument.

11/03/2019

USGG5yr quarterly : We are well above the 2.0489 50 period moving average but the “clincher” is the RSI, it is at 1981 proportions! Historically it is telling me peoples perceptions on rate expectations have gotten ahead of reality. It will be a HARD and PAINFUL fall.

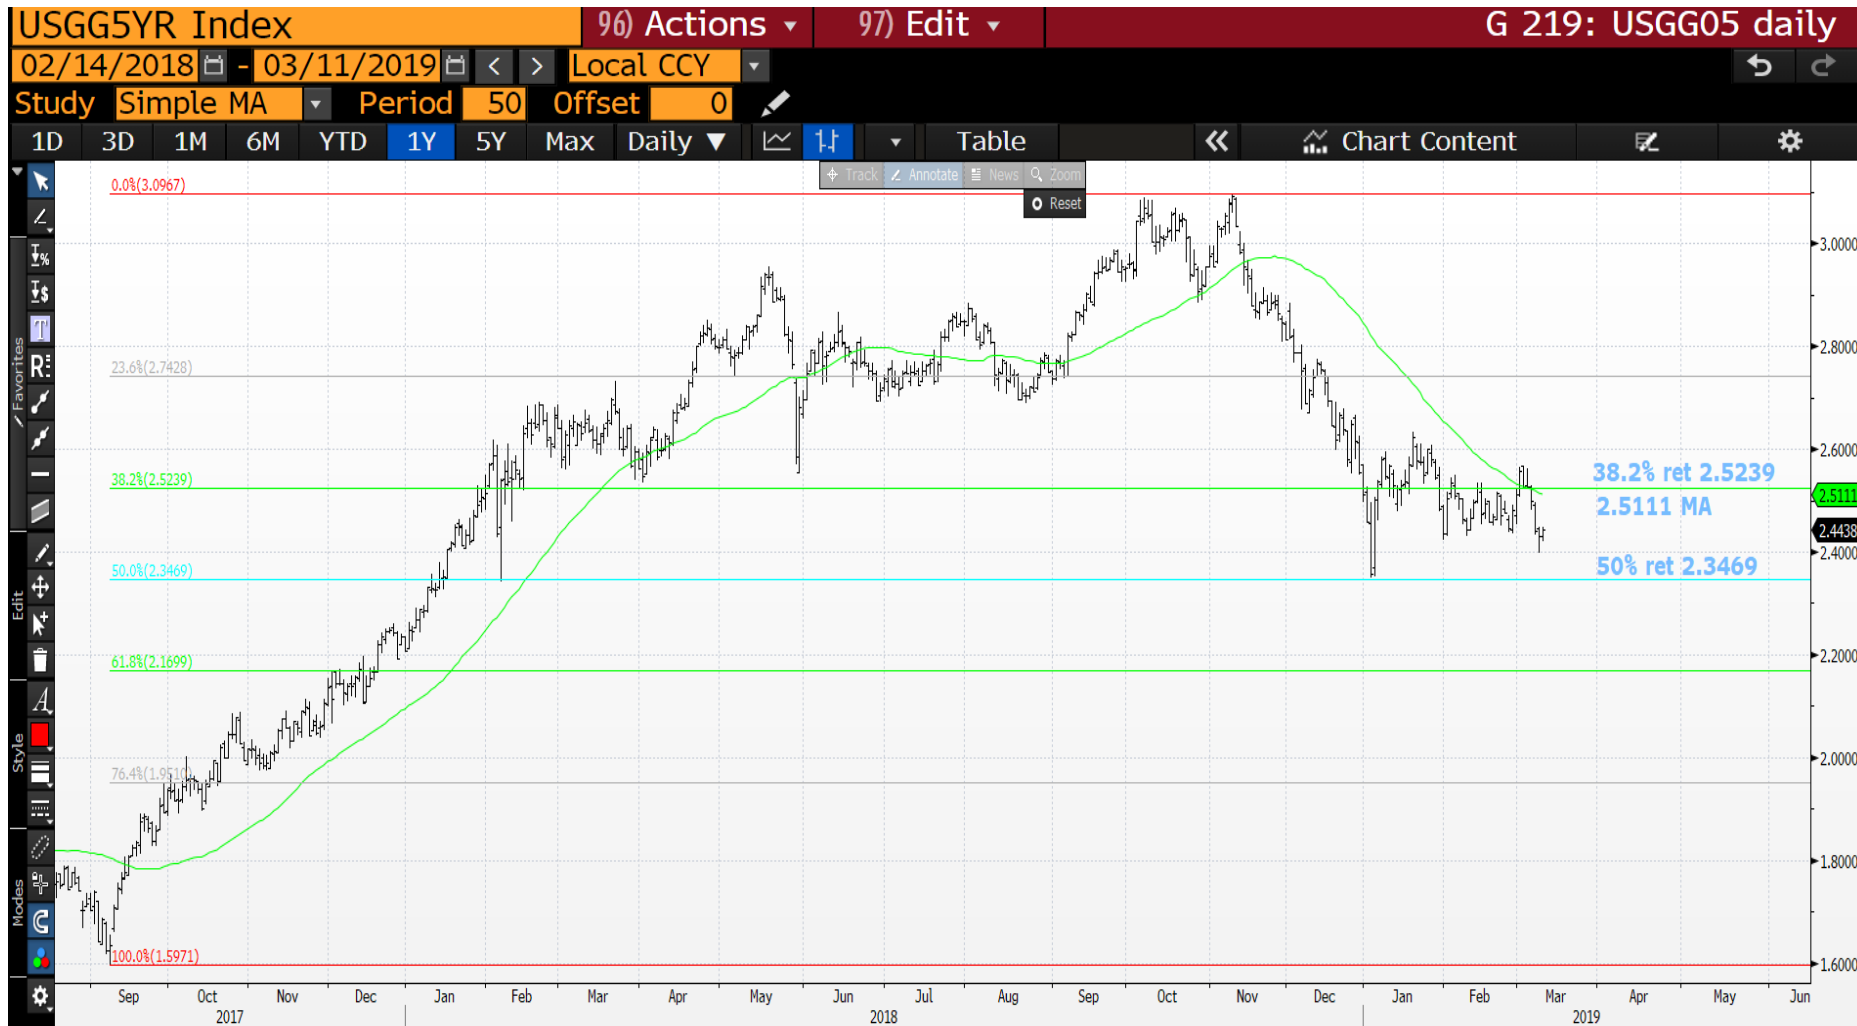

USGG5yr monthly : This time the 200 period moving average 2.4360 is very useful, highlighting 2 previous failures and now offering solid support. Obviously a breach of this is KEY to further progress.

USGG5yr weekly : Further evidence of the level we need to breach. This time the 100 period moving average 2.4046 ties in with the 38.2% ret.

USGG5yr daily : Again a daily chart that lacks BOUNCE and remaining sub the 38.2%ret
2.5239 is key. A breach of the 50% ret 2.3469 will help ALOT.

USGG2yr quarterly : This chart is very clean and clear in its representation, we have hit a rare 100 period 2.9439 with an RSI dislocation matching that of 1980. It is worth noting that since 1980 we have had other event miles-stones that failed to really influence the RSI, as NOW.

This tells me there is a lot of positions and expectation on this bet for higher rates!

USGG2yr monthly : We have failed the multi year 38.2% ret 2.7357 and thus should head lower. Again the RSI is a compliment.

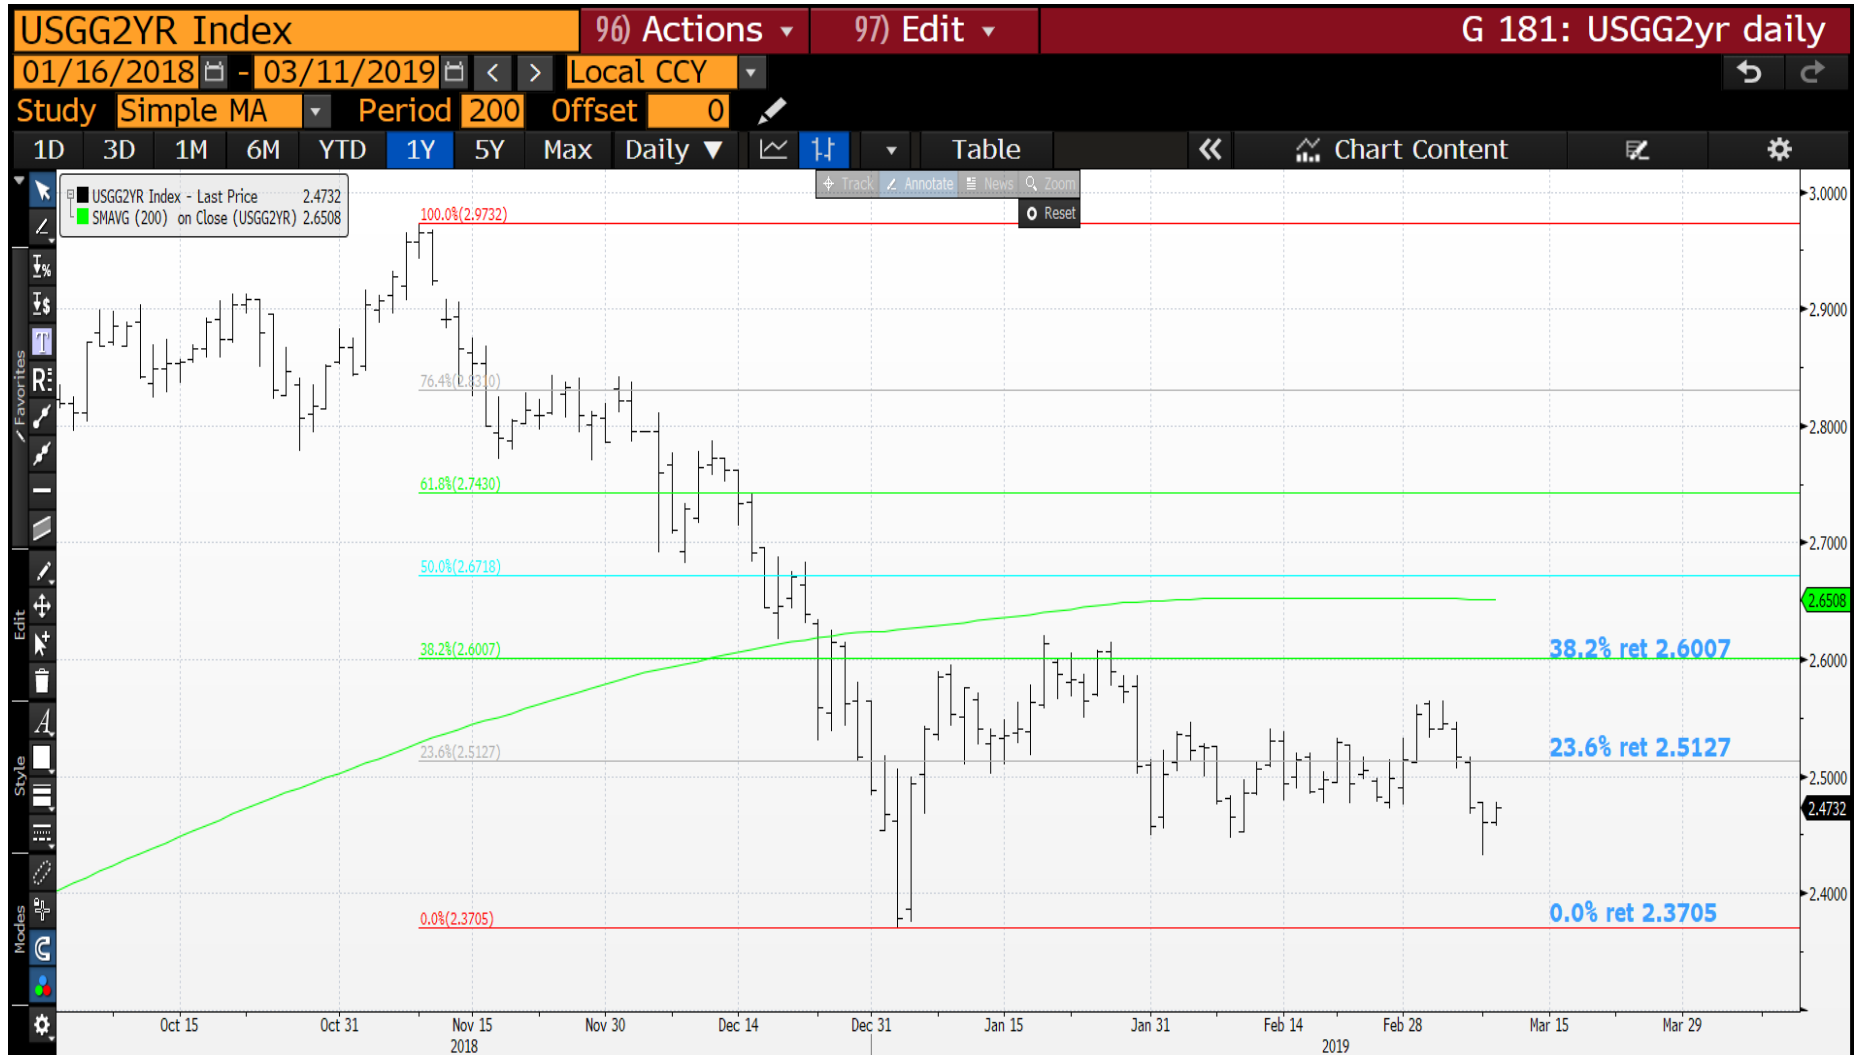

11/03/2019

14

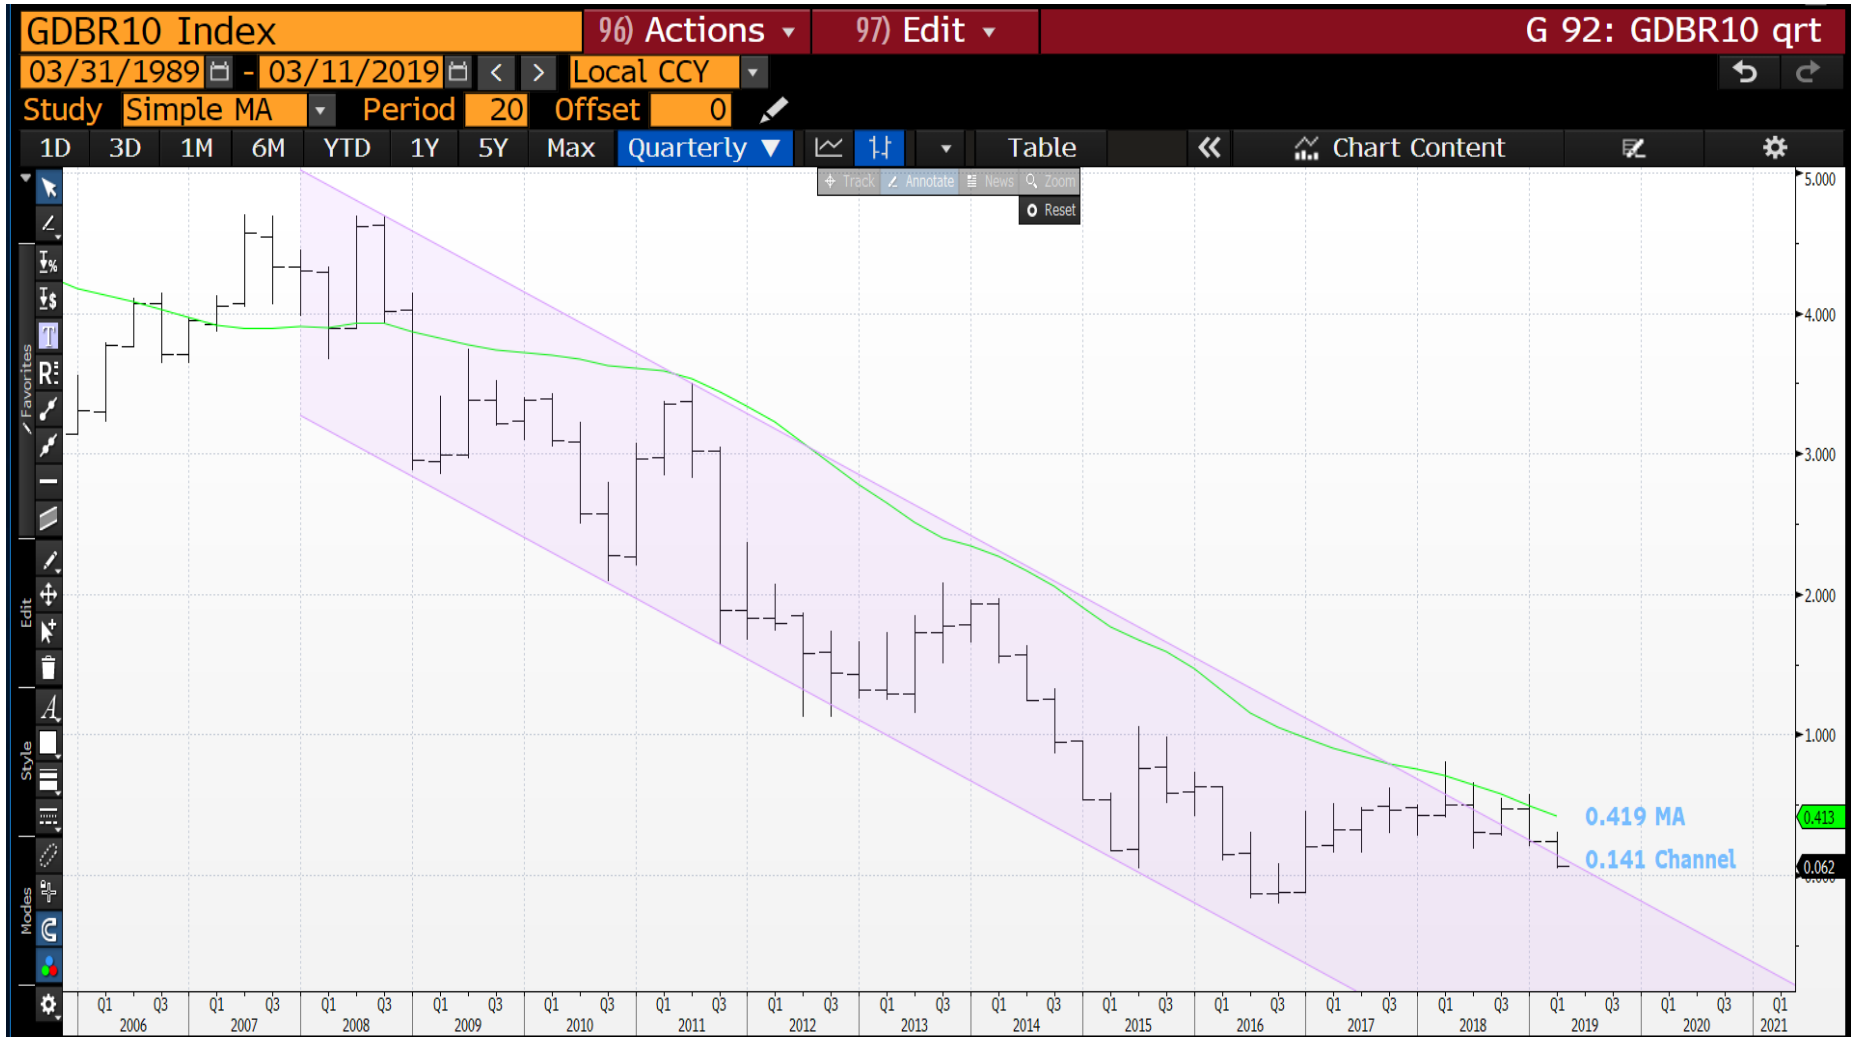

USGG2yr weekly : The weekly is in positive territory but any breach of the 38.2% ret 2.1035 will be a major signal.

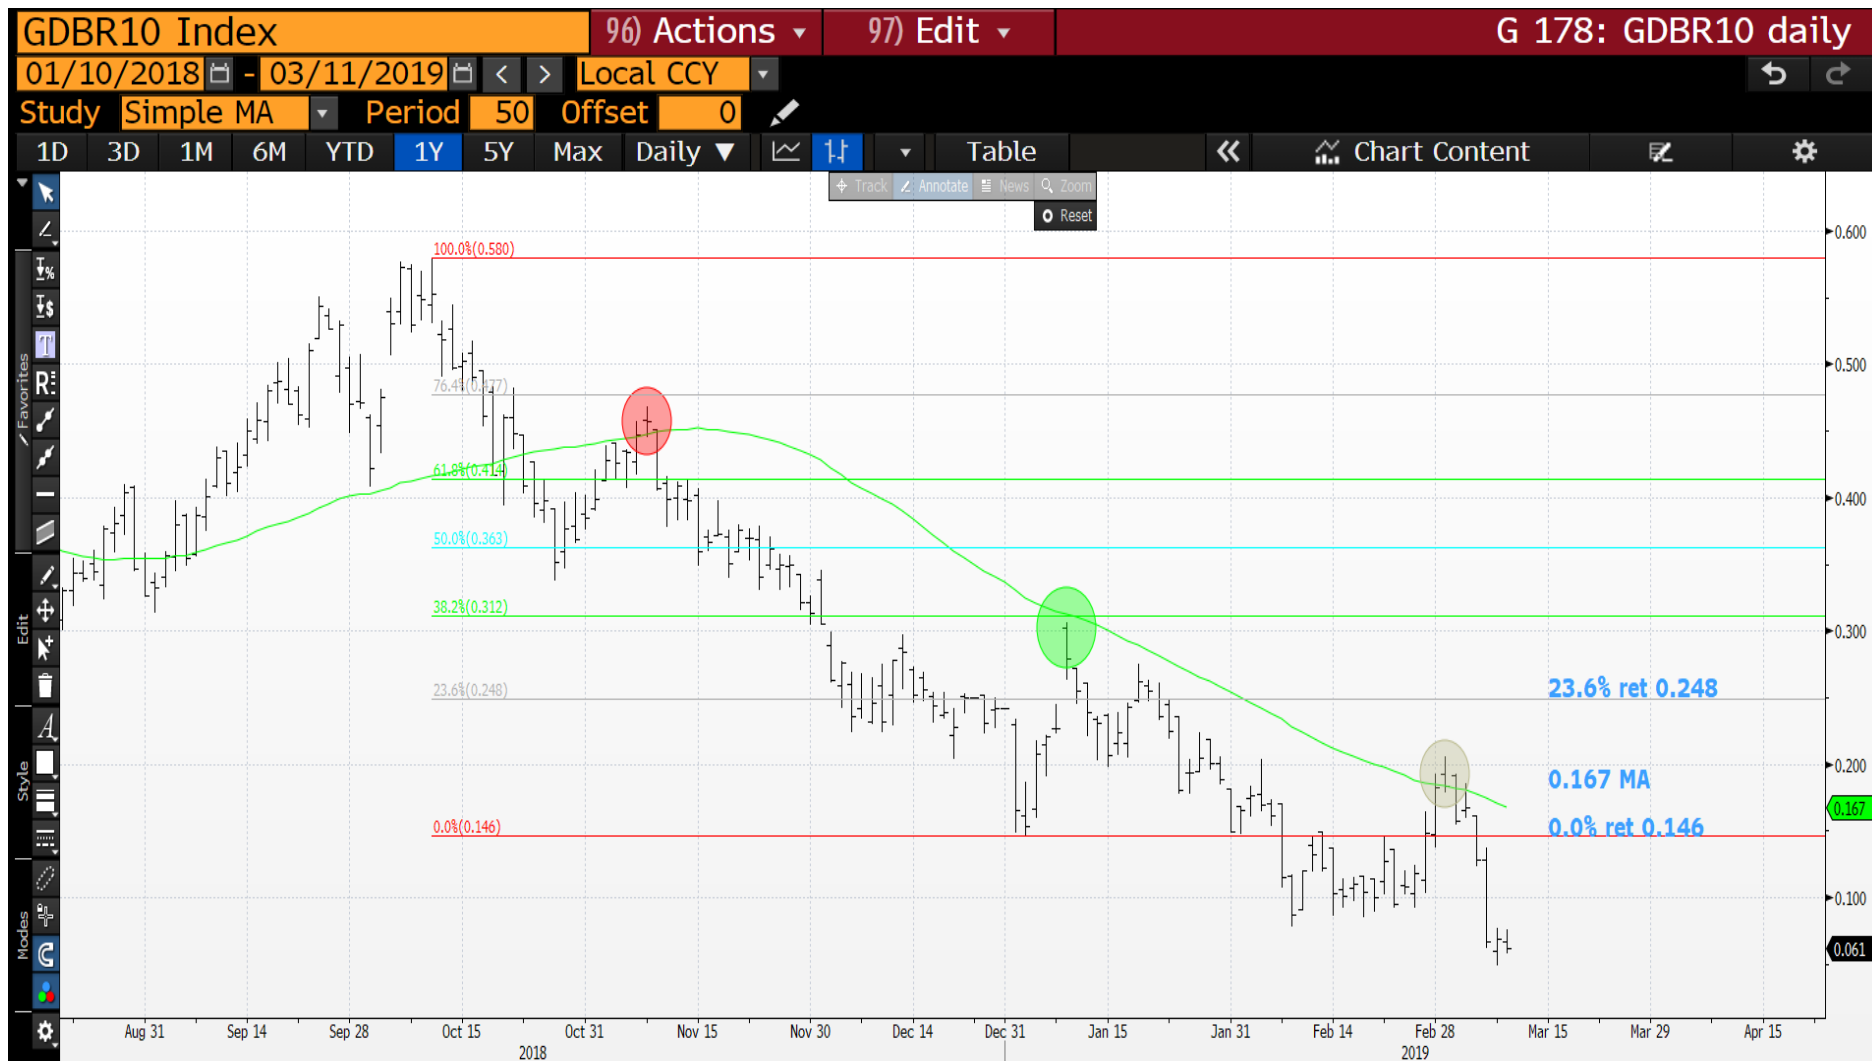

USGG2yr daily : Again the minimal bounce and remaining sub the 23.6% ret 2.5127 aids the over all call lower.

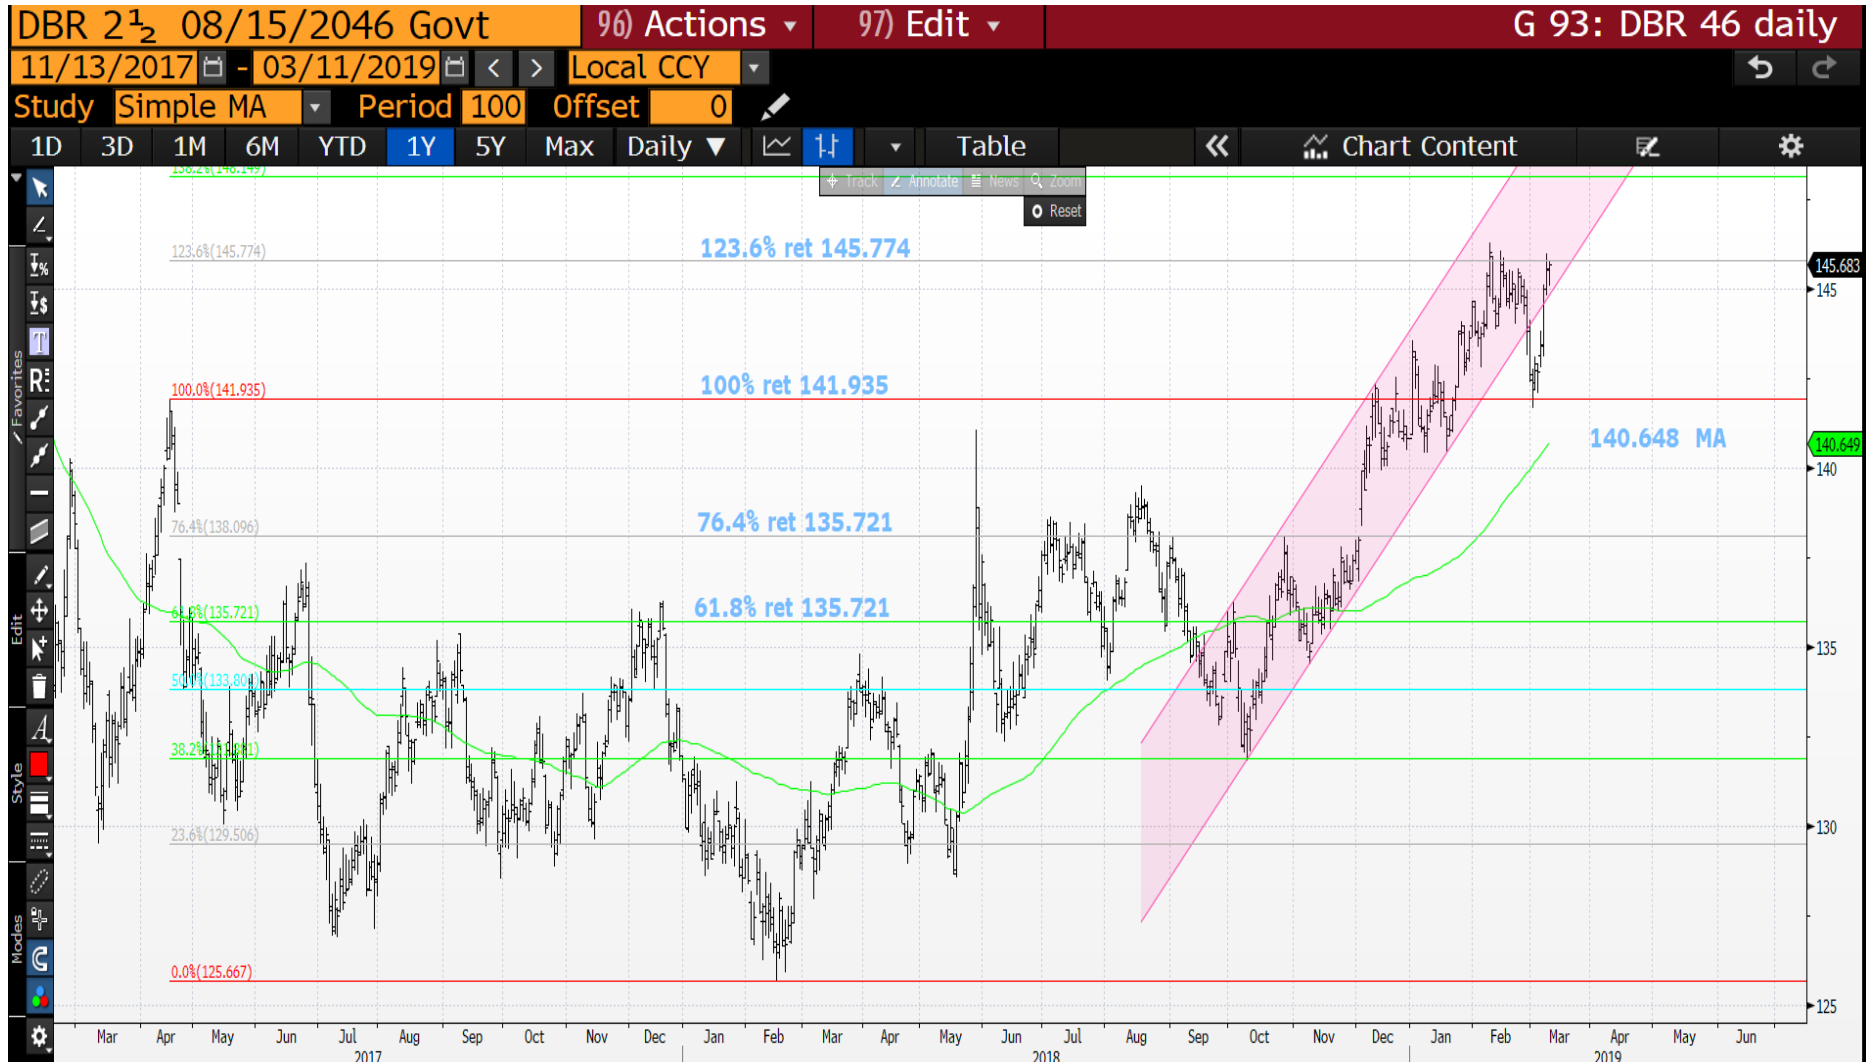

Generic German 10yr quarterly : We are well and truly back in the 0.141 channel thus should keep heading lower.

Generic German 10yr daily : Post the breach of 0.146 previous lower we keep grinding lower.

DBR 46 daily : This reliable bond does it again, holding a decent pull back and now back in the channel. Hopefully we will make fresh highs this week.

Italian generic 10yr daily : The RSI is low just as we hit the 2.463 previous level.

GUKG10 monthly : This highlights a singular trend lower, sub the 100 period moving average since 2009.

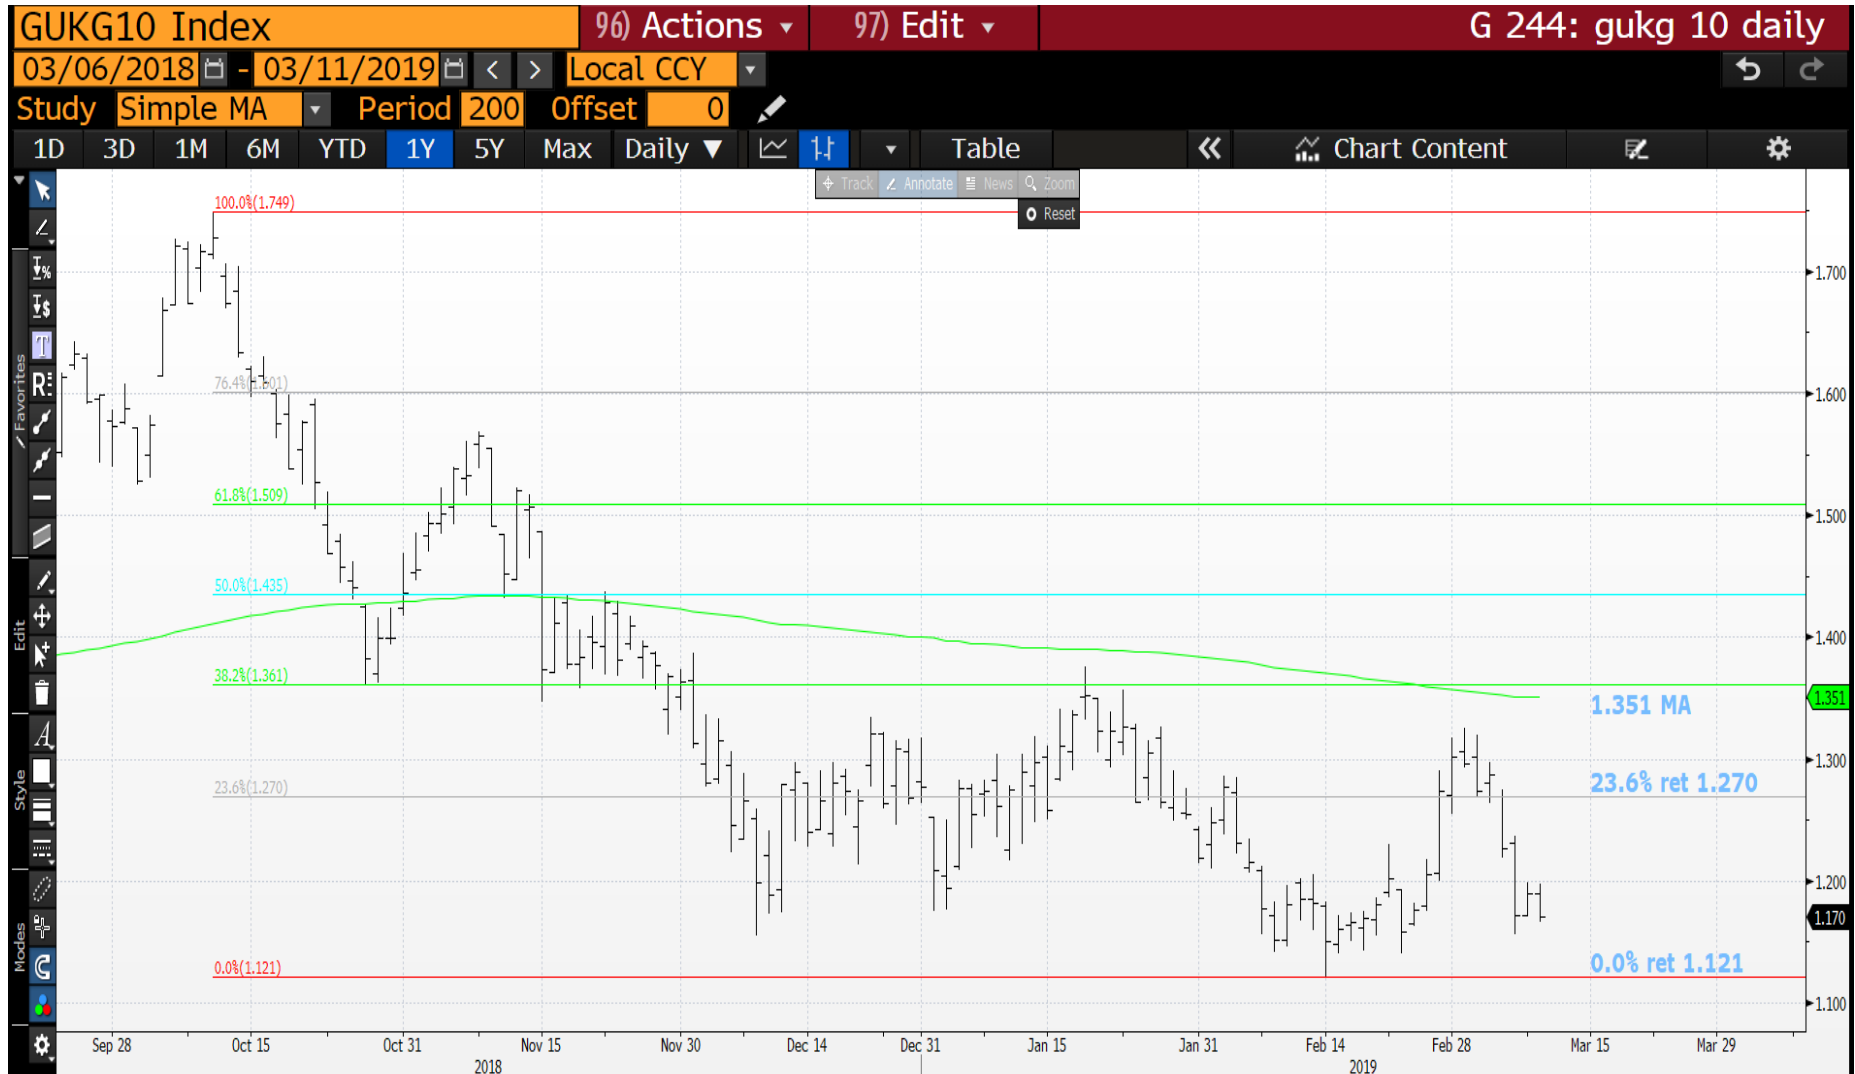

11/03/2019

21

GUKG10 weekly : We have stalled against the 200 period moving average 1.376 and closing sub the 38.2% ret 1.154 will help a lot.

USGG2yr daily : Again the minimal bounce and remaining sub the 200 day moving average
1.351 aids the over all call lower. A close sub the 23.6% ret 1.270 will force a push to the
recent lows.
