BOND UPDATE: WE HAVE WITNESSED "SUBSTANTIAL" MOVES OF LATE RESULTING IN SOME "VERY" DISLOCATED RSI'S, WE NEED TO ADDRESS THOSE FIRST. IT IS WORTH LOOKING AT THE DAILY RSI'S ON CURVES, 102030 FLY AND YIELDS AS SOME ARE EXTENDED TO A 1994 STATUS.

THE 30YR BOND YIELD STANDS OUT AS IT HAS HIT ITS 200 DAY MOVING AVERAGE 1.9202 (PAGE 13).

BOND YIELDS HAVE BOUNCED HOWEVER ALL MONTHLY RSI CHARTS CONTINUE TO CALL FOR "LOWER" YIELDS.

US BOND AND SWAP CURVES CONTINUE TO "SCREAM" FOR A MAJOR FLATTENING GIVEN THE HISTORICAL RSI DISLOCATION. THE OTHER POINTER IS THE 102030 SWAP CURVES CONTINUES TO INDICATE THE 20YR IS "OUT OF LINE" WITH THE WINGS!

1/06/2021

1

US102030 Swap monthly: Finally we have a LONGTERM TOP so should see the 20yr sector perform. We have hit and held the 38.2% ret 25.7843 thus a good point to take a pause.

Sub the 38.2% ret will put us into FREE FALL territory.

US102030 Swap daily: This RSI is as dislocated as August 2019-March 2020 when the move higher was initiated.

US 5-30 Swap monthly: We have had the flattening the RSI's have been calling for, if 2008 is to be replicated then this could flatten massively. Plenty of room to head lower, sub the 61.8% ret 83.498. Short-term we should hold given the next chart shows a 1994 RSI dislocation.

US 5-30 monthly: This too is a very nasty long-term TOP formation, we double topped against the 38.2% ret 166.202. If we breach the 50% ret 121.588 it will open the flood gates.

US 5-30 daily: Another VERY LOW RSI, THE LOWEST EVER! If we re-breach the 38.2% ret 109.395, that will open the flood gates.

US 10-30 Swap monthly: We have a MAJOR TOP if we replicate 2008 and sub 40.00 produced some big stops. Like the previous charts we should pause given the daily RSI dislocations.

US 10-30 monthly: We have steady progress and remaining sub the 50% ret 53.918 will hopefully see us target the 61.8% ret 38.721.

US 10-20 Swap weekly: We are now sub all major levels leaving a MAJOR LONGTERM TOP behind.

USGG30yr monthly: We persist in remaining sub the 2.4242 50 period moving average and the RSI has only just kinked LOWER. The next couple of months should have VERY MUCH INCREASED ranges as we head lower once we have worked off the DAILY RSI DISLOCATIONS.

USGG30yr weekly: We have breached the 50% ret 2.0804 but need to work off the daily dislocated RSI.

USGG30yr daily: Although the RSI is not too DISLOCATED the 200 day moving average KICKS IN at 1.9202.

US 10yr yield monthly: Yields have bounced this month but ideally we breach the lows by month end.

US 10yr yield weekly: 10yr yields do seem to adhere to technical levels GIVEN we failed the 50% ret 1.7866 and have found support at the 38.2% ret 1.439. Ideally we work off the daily RSI dislocations and breach the 38.2% ret.

US 10yr yield daily: The RSI is mixed but we have held the 23.6% ret 1.4295.

US 5yr yield weekly: We are TEASING the 23.6% ret 0.8737 AGAIN and ideally head lower soon.

DBR 46 weekly: We breached the 50% ret 157.561 but the daily RSI has paused proceedings.

DBR 46 daily: We might need to work off the daily RSI and dip below the 50% ret 157.561.
